

Basic instructions for using Country Paint Gussy Up

Country Paint Gussy Up Gilding wax is a final step to enhancing detail on your project. Gilding is a process of applying a metallic finish to various surfaces.

Gussy Up can be applied by finger rubbing it onto the surface of your completed project.

You may repeat this process several times to achieve the look you desire.

Gussy Up may also be applied with a rag or paintbrush (usually diluted with a few drops of mineral spirits).

Let dry over night (the more you apply, the longer drying time required).

Buff if desired.

Please note, this product is not intended to be a protective finish, it is for decorative purposes only.
